

## Industrial Automation Services

*Problem Solvers Delivering Solutions*

*A sales and service company dedicated to supplying:  
Valves, Automated Valve Assemblies, Process  
Measurement Instrumentation, Liquid Analytical  
Instrumentation and Field Service*

# INDUSTRIAL AUTOMATION SERVICES

## Product Lines

# DeZURIK

Valves - Municipal & Mining plug, butterfly, gate, check, ball & cone valves.

APCO | HILTON

Electric Actuation - valve actuation & controls, extremely accurate and repeatable with an unmatched stiffness to hold position.

Valves - diaphragm, globe, butterfly and solenoid valves. Suitable for heavily contaminated media and sanitary or industrial applications.

measure the facts

Industrial Process Instrumentation - Flowmeters: coriolis, magnetic, ultrasonic, variable area, vortex, level. Pressure, temperature and analytical instrumentation.

Saunders & Xomox Valves - quarter turn & butterfly valves. Corrosive, erosive and toxic chemical applications.

Cera System Valves - engineered ceramic valves, metal and plastic valves. Specializing in severe applications and high temperature environments.

Liquid Analytical - measurements of pH, conductivity, turbidity, dissolved oxygen, chlorine and nitrates.

Instrumentation - inductive & capacitive proximity sensors, flow switches, connectors, cables, cord sets, fieldbuses and automation controls. No need to run a conduit.

Worcester, Durco & PMV - plug, butterfly & ball valves; positioners and switches.

Steam Process Equipment- condensate recovery pumps and heat exchangers, automated control valves and steam traps.

Valves - World's toughest ball valve. Metal or soft seated, cast or custom machined.

Power - Industry leader in nuclear density and level measurements. Also offers liquid flow products.

Control Valves - multiple sizes & materials, including exotics.

Valve Actuation & Control - Linear actuators provides 250-400 steps over 90 degrees, no overrun, no hunting.

Instrumentation - measuring pressure, temperature, level and flow.

Valve Actuation & Control - innovative solutions for networking, monitoring, and controlling process valves.
